

"An invitation to dine"
- Ben Smith

Meeting the expectations?

The PhD candidates at UiB assess their supervisors

Jan Fredrik Hovden & Ole-Johan Mjøs
Department of Information Science and Media Studies
jan.hovden@uib.no & ole.mjøs@uib.no

The data

- Web survey to UIB PhD-candidates Dec. 2014/15*
- N=337
- Four faculties:
 - Social Science (76)
 - Law (16)
 - Psychology (64)
 - Natural Sciences (178)
 - Unspecified (3)
- Adj. response rate: 49,9%

* 2014 (Dec.)=Faculty of Social Science, the other faculties in 2015 (Dec.)

The questionnaire

- **General satisfaction with supervision**
- **Optimism about final quality of thesis**

- **Faculty/institute**
- **Social background of candidate**
 - age, gender, parents' educational level, foreign student
- **Educational background of candidate**
 - same supervisor, master at UiB
- **PhD situation**
 - monograph/article, year of PhD, co-supervisor, office at UiB, has changed supervisor, part-/full-time

- **Age / gender of supervisor**
- **Supervisors «supervising style»**
 - Preferred (25 items)
 - Experienced (25 items)

- **Open questions: “What aspects of your working relationship with your main supervisor are you most/least pleased / satisfied with?”**

On the table today

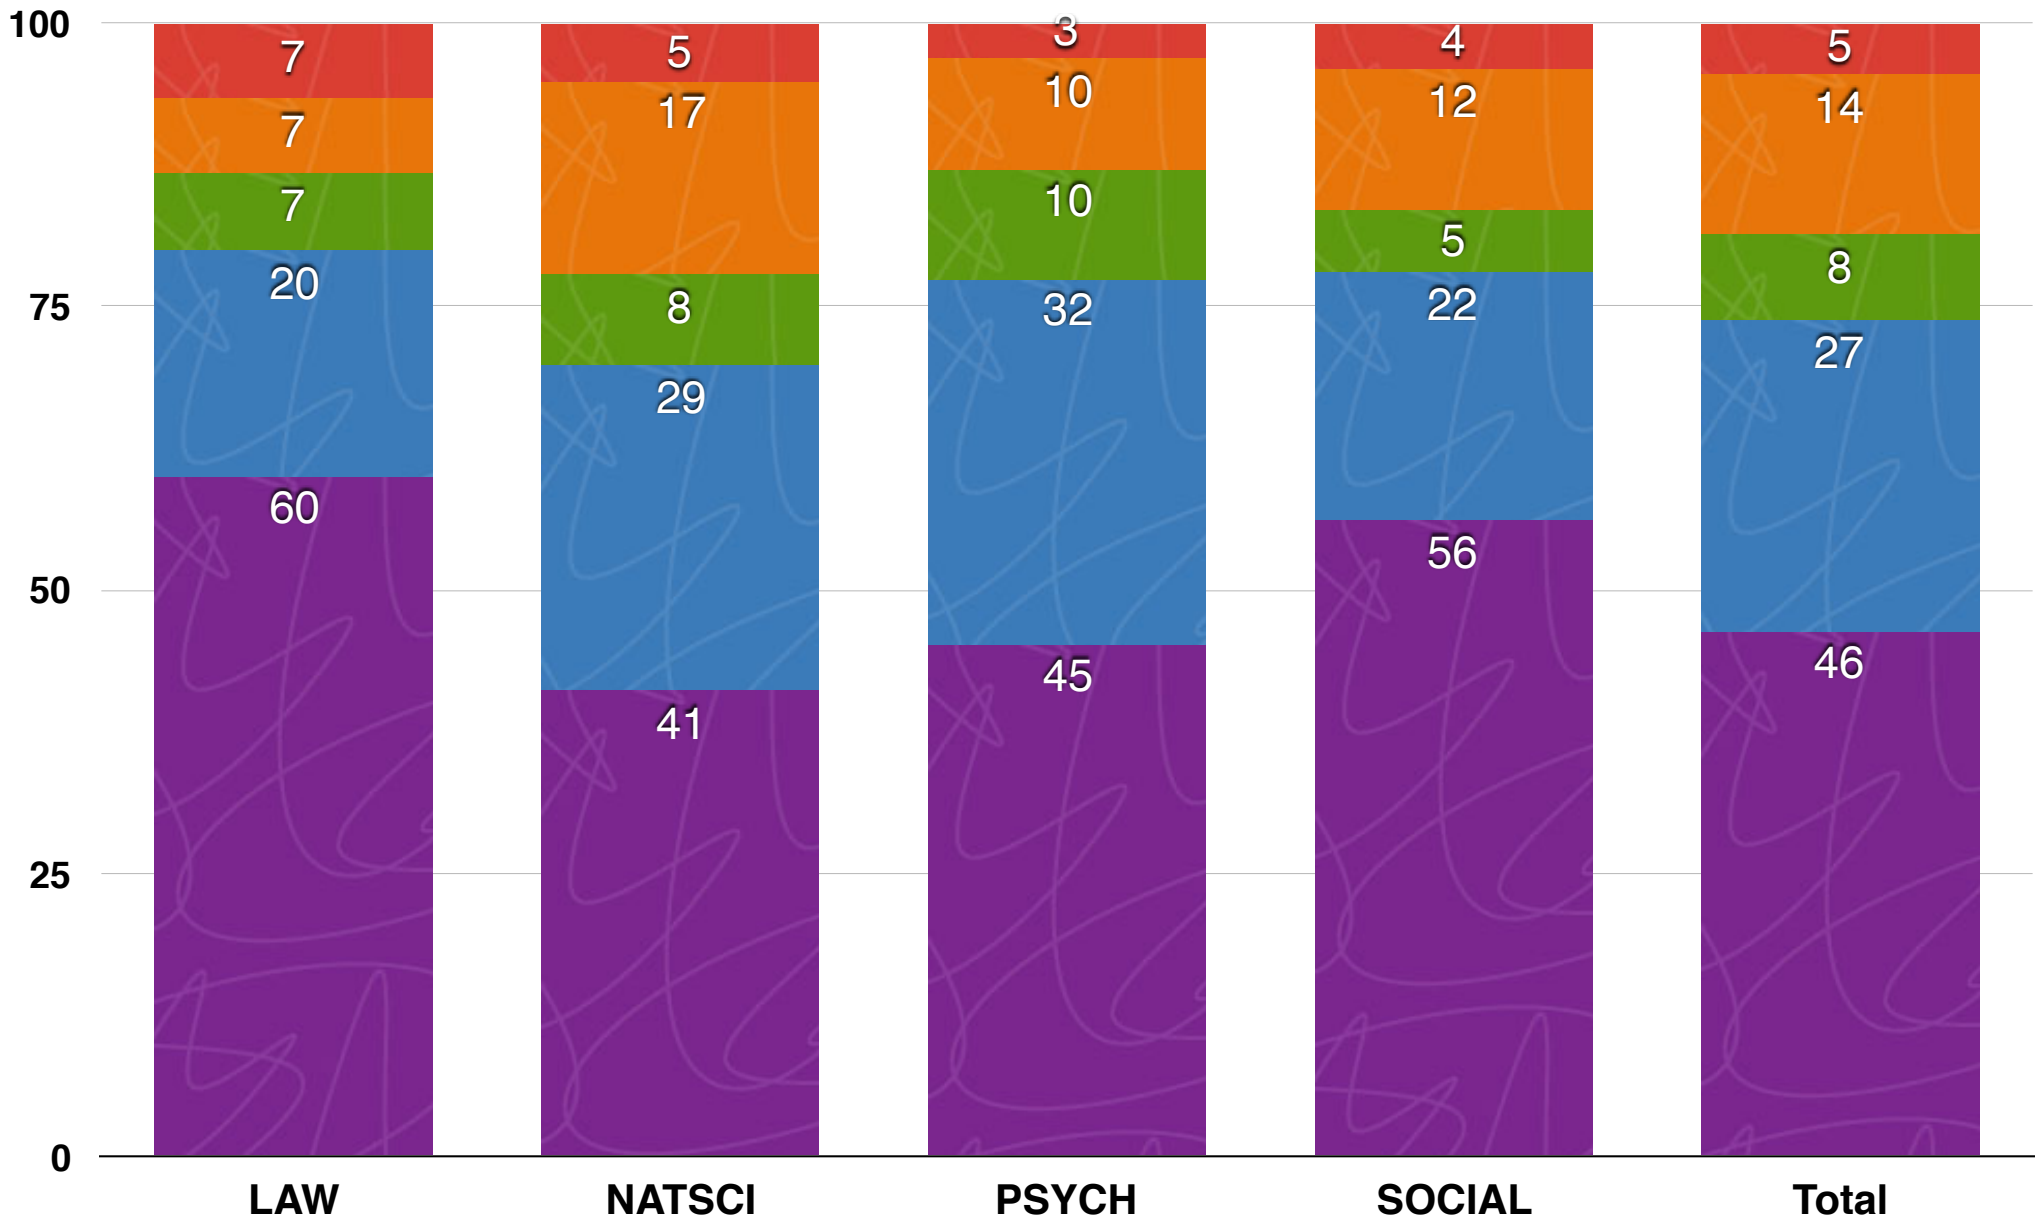

- Are the PhD-candidates **satisfied** with their supervisors?
- Are they **optimistic** about their thesis final quality?
- What **factors** are linked to dissatisfaction and pessimism?
- What do they see as **desirable qualities** in a supervisor?
- How do their own supervisors **live up to** this? Where are the **gaps**?
- How does their ideals - and the perceived gaps - **vary** with **faculty, social characteristics** of the **candidate** and the **supervisor**, and their **PhD situation**?
- Finally: **The Psychology PhD-candidates - in their own words**

"Doubt begins at breakfast"
- Ben Smith

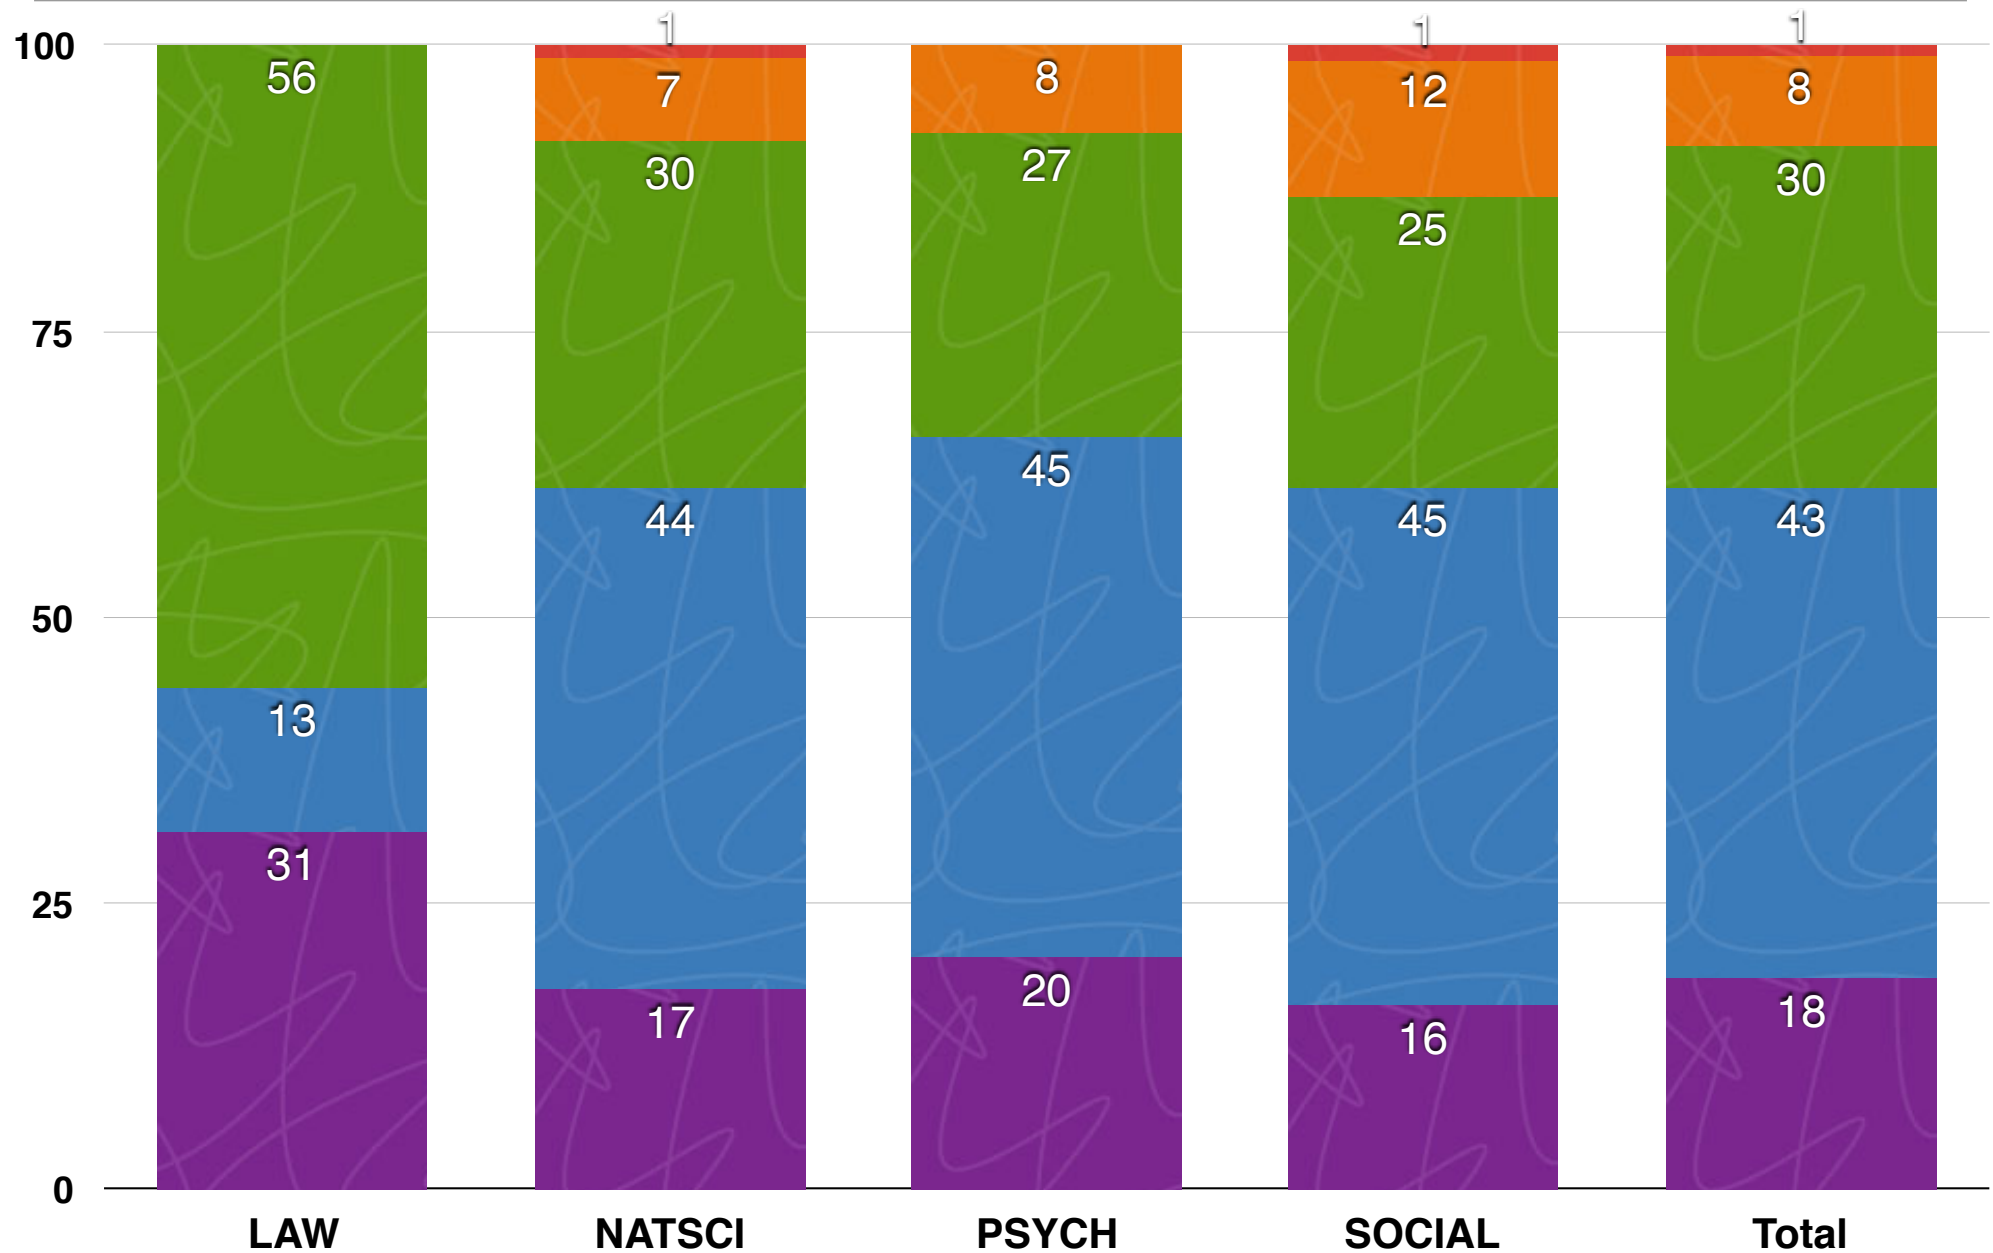

«How satisfied are you, all in all, with the supervision of your PhD thesis?»

- Very unsatisfied
- Somewhat unsatisfied
- Neither satisfied or unsatisfied
- Somewhat satisfied
- Very satisfied

«How optimistic or pessimistic are you about the quality of your completed thesis?»

- Very pessimistic
- Somewhat pessimistic
- Neither optimistic or pessimistic
- Somewhat optimistic
- Very optimistic

Who are dissatisfied and pessimistic? (odds ratios)

- **Being unsatisfied with supervision is more likely if ...**
 - ...the candidate is late (1,6) or writing a monograph (1,2)
 - ...the candidate is 30+ years old (1,3) or female (1,2)
 - ...the candidate do not have a co-supervisor (1,3)
 - ...the supervisor is **another** gender (1,3)
 - ...the supervisor did **not** supervise their master thesis (1,3)
- **Pessimism for the thesis is more likely if ...**
 - ...the candidate is late (1,3) or writing a monograph (1,6)
 - ...the candidate is < 30 years old (1,6)
 - ...the candidate do not have a co-supervisor (2,3^{**})
 - ...the supervisor is **the same** gender (1,6)
 - ...the supervisor supervised their master thesis (1,3)

And of course, dissatisfaction and pessimism are closely linked (OR: 4,1)

What kind of supervisor do the PhD-candidates want?

"Types of Mankind", Nott and Gliddon, 1854

Monitor and provide feedback about my performance to ensure adequate progress
 Introduce me to scholarly networks
 Assist me to publish my research
 Inform me of supervisor's/school's expectations in regard to performance and progress
 Ensure that I have a project of appropriate size and degree of difficulty
 Require written work on a pre-arranged schedule so progress can be assessed regularly
 Give me support and guidance in preparation of my written thesis
 Comment on the content and drafts of my thesis
 Share knowledge with me
 Maintain close regular contact/meetings on a pre-arranged schedule
 Be interested in my research project
 Help me to identify important goals
 Provide pointed/pertinent supervision
 Suggest ways that I can make the most effective use of time
 Help me to develop academic writing skills
 Recognize and develop my intellectual property
 Relay the extent of support available for research on topic selected, resources
 Make available regular discussion groups for both myself and other students
 Treat me equitably/fairly in terms of time and effort
 Give me new ideas for research
 Support me on technical issues and problems
 Keep records of all meetings and indicate action taken or advice given
 Assist me in consulting other people for expertise
 Give me strong encouragement in my research
 Answer my specific questions
 Be well informed about the different aspects of research support (eg grants & sc
 Be an expert in my area of research
 Be available and easy to approach about any problem
 Listen to and respect my existing knowledge and skills
 Have general expertise in supervising research
 Encourage me to become interested in areas outside my research topic
 Encourage me to explore issues for myself
 Help me with topic selection
 Provide a lot of detailed supervision (quantity)
 Help me on extra-research issues such as personal life, employment and technical training

Univ. of Western
 Australia (1994).
 "Student Perceptions of
 Research Supervision
 (SPORS)".

(1) (2) (3) (4) (5)
 Low High

Preferred qualities in a PhD supervisor (all faculties)

Differences between faculties

- **preferred** supervision styles

Preferred supervision styles: 3 components (PCA)

Only top six variables for each component is shown

1. “The research leader”

Support me on technical issues and problems

Assist me to publish my research

Help me on extra-research issues such as personal life, employment and technical

Help me with topic selection

Give me new ideas for research

Make available regular discussion groups for both myself and other students

Relay the extent of support available for research on topic selected, resources

Listen to and respect my existing knowledge and skills

Be interested in my research project

Treat me equitably/fairly in terms of time and effort

Comment on the content and drafts of my thesis

Give me strong encouragement in my research

Encourage me to explore issues for myself

2. “The patron-colleague”

Require written work on a pre-arranged schedule so progress can be assessed regularly

Maintain close regular contact/meetings on a pre-arranged schedule

Provide a lot of detailed supervision (quantity)

Monitor and provide feedback about my performance to ensure adequate progress

Suggest ways that I can make the most effective use of time

Ensure that I have a project of appropriate size and degree of difficulty

3. “The schoolteacher”

Preferred supervision styles: 3 components (PCA)

Factors that correlate this style of supervision (correlations)

1. “The research leader”

Being satisfied with the supervision (.15) and optimistic (.16)

Writing an article-based PhD (.15)

Being in the first or second year of PhD. work (.13)

Being female (.12) or a foreign student (.11)

Is a candidate at the faculty of Law (.18), Psychology (.20) or Social Sci. (.25) (NatSci= -.44)

Being female (.25) or >30 years of age (.17) or NOT a foreign student (-.28)

Writing a monograph (.24)

Supervisor is another gender (.16)

Having taken the master at UiB (.14)

Being satisfied with the supervision (.11) and optimistic (.13)

2. “The patron-colleague”

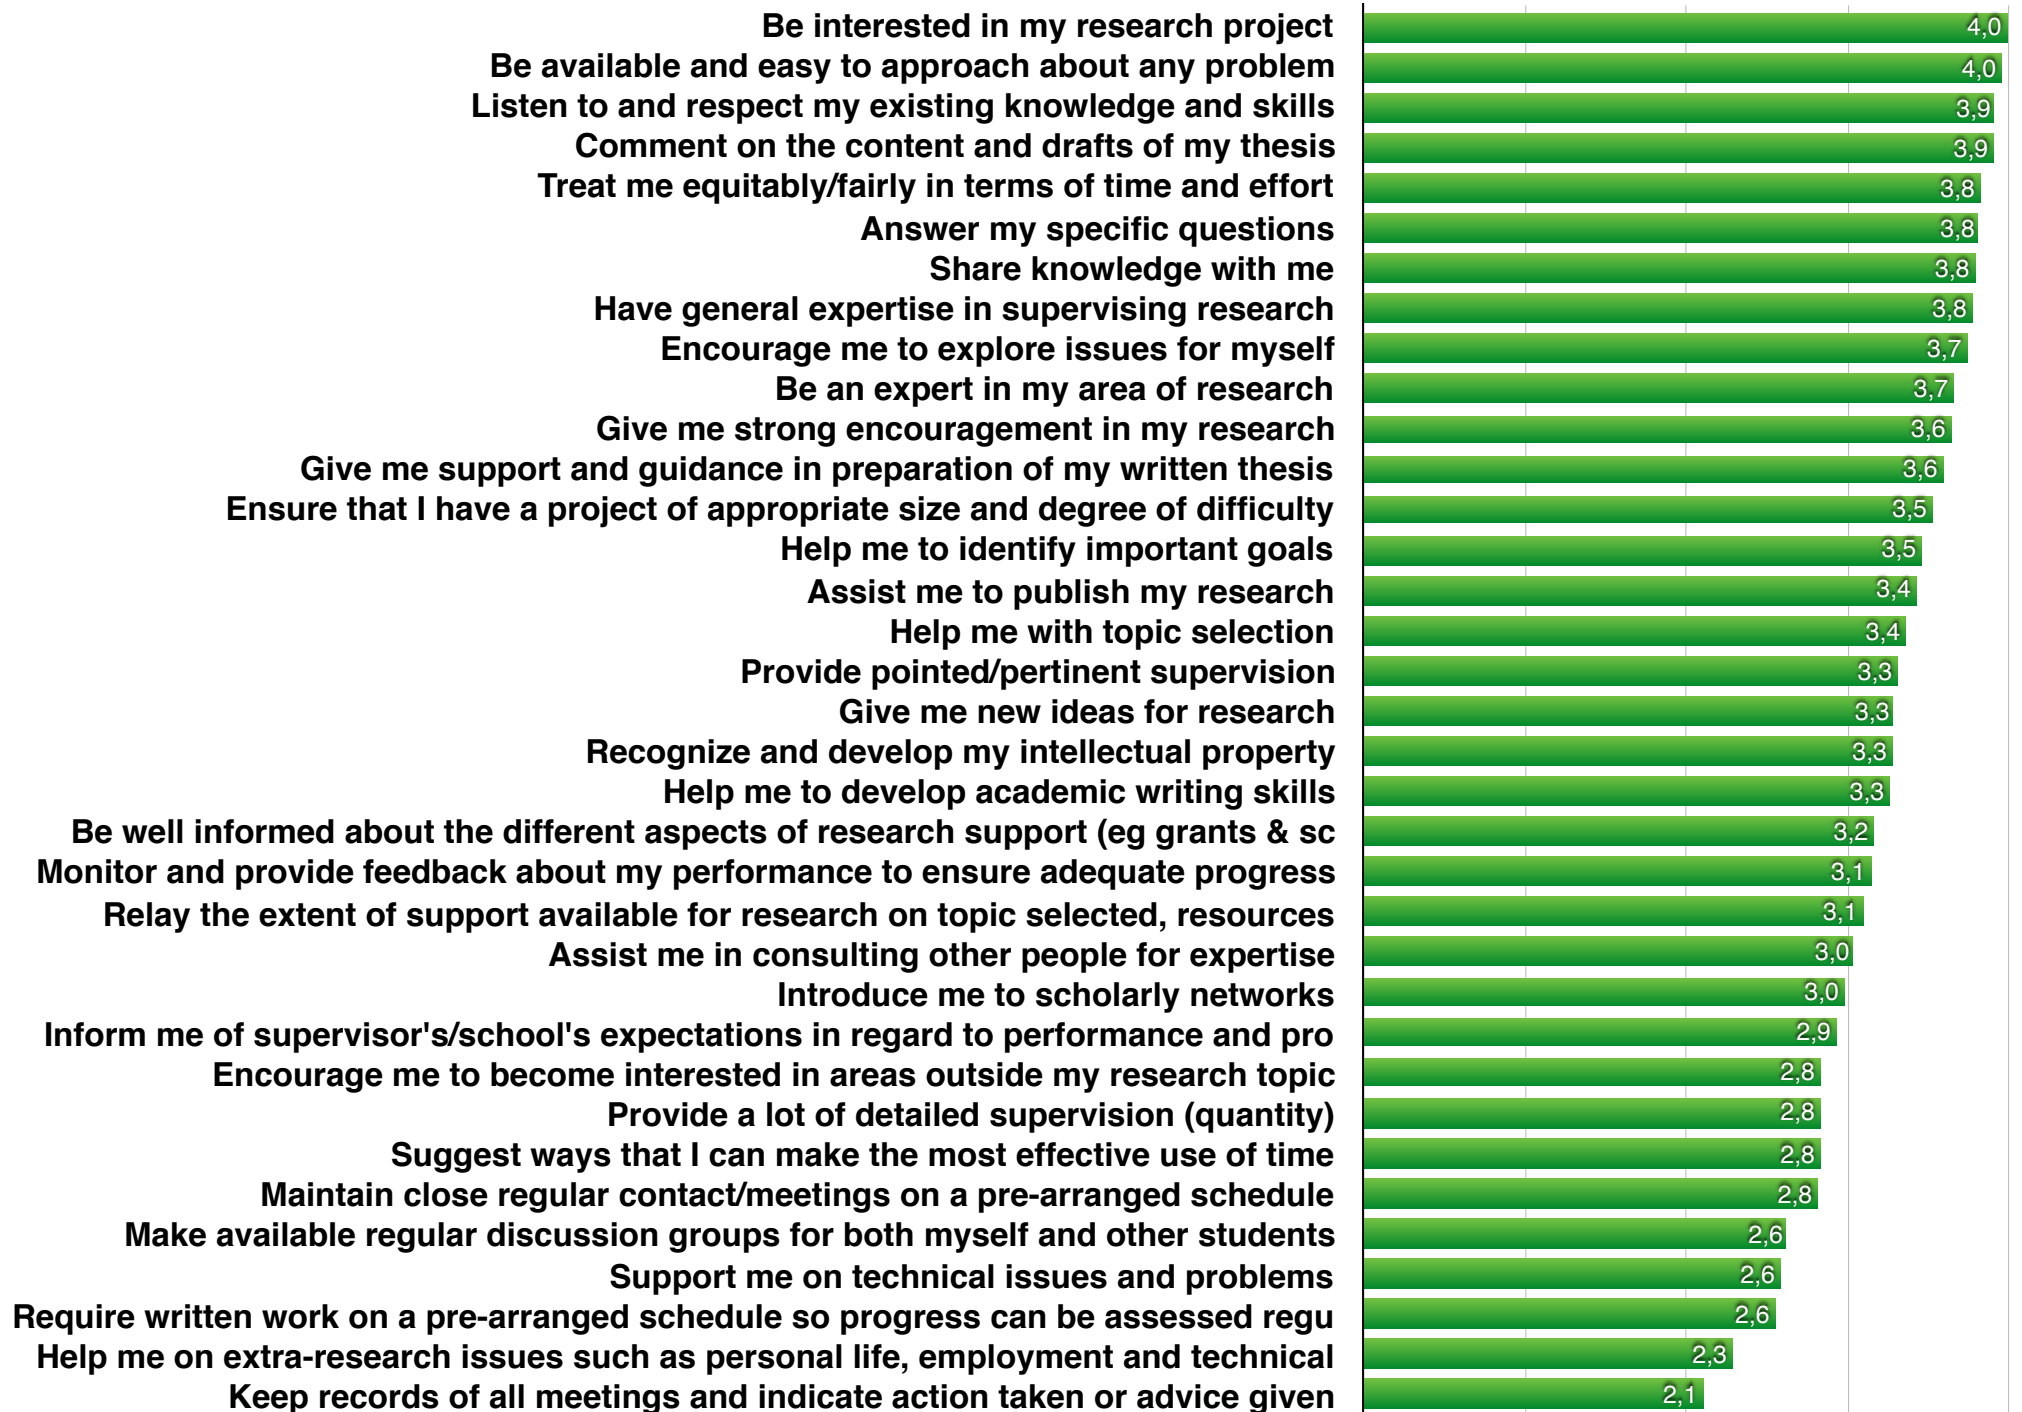

3. “The schoolteacher”

Being a candidate at the Faculty of Law (.22) but not Natural Sciences (-.21)

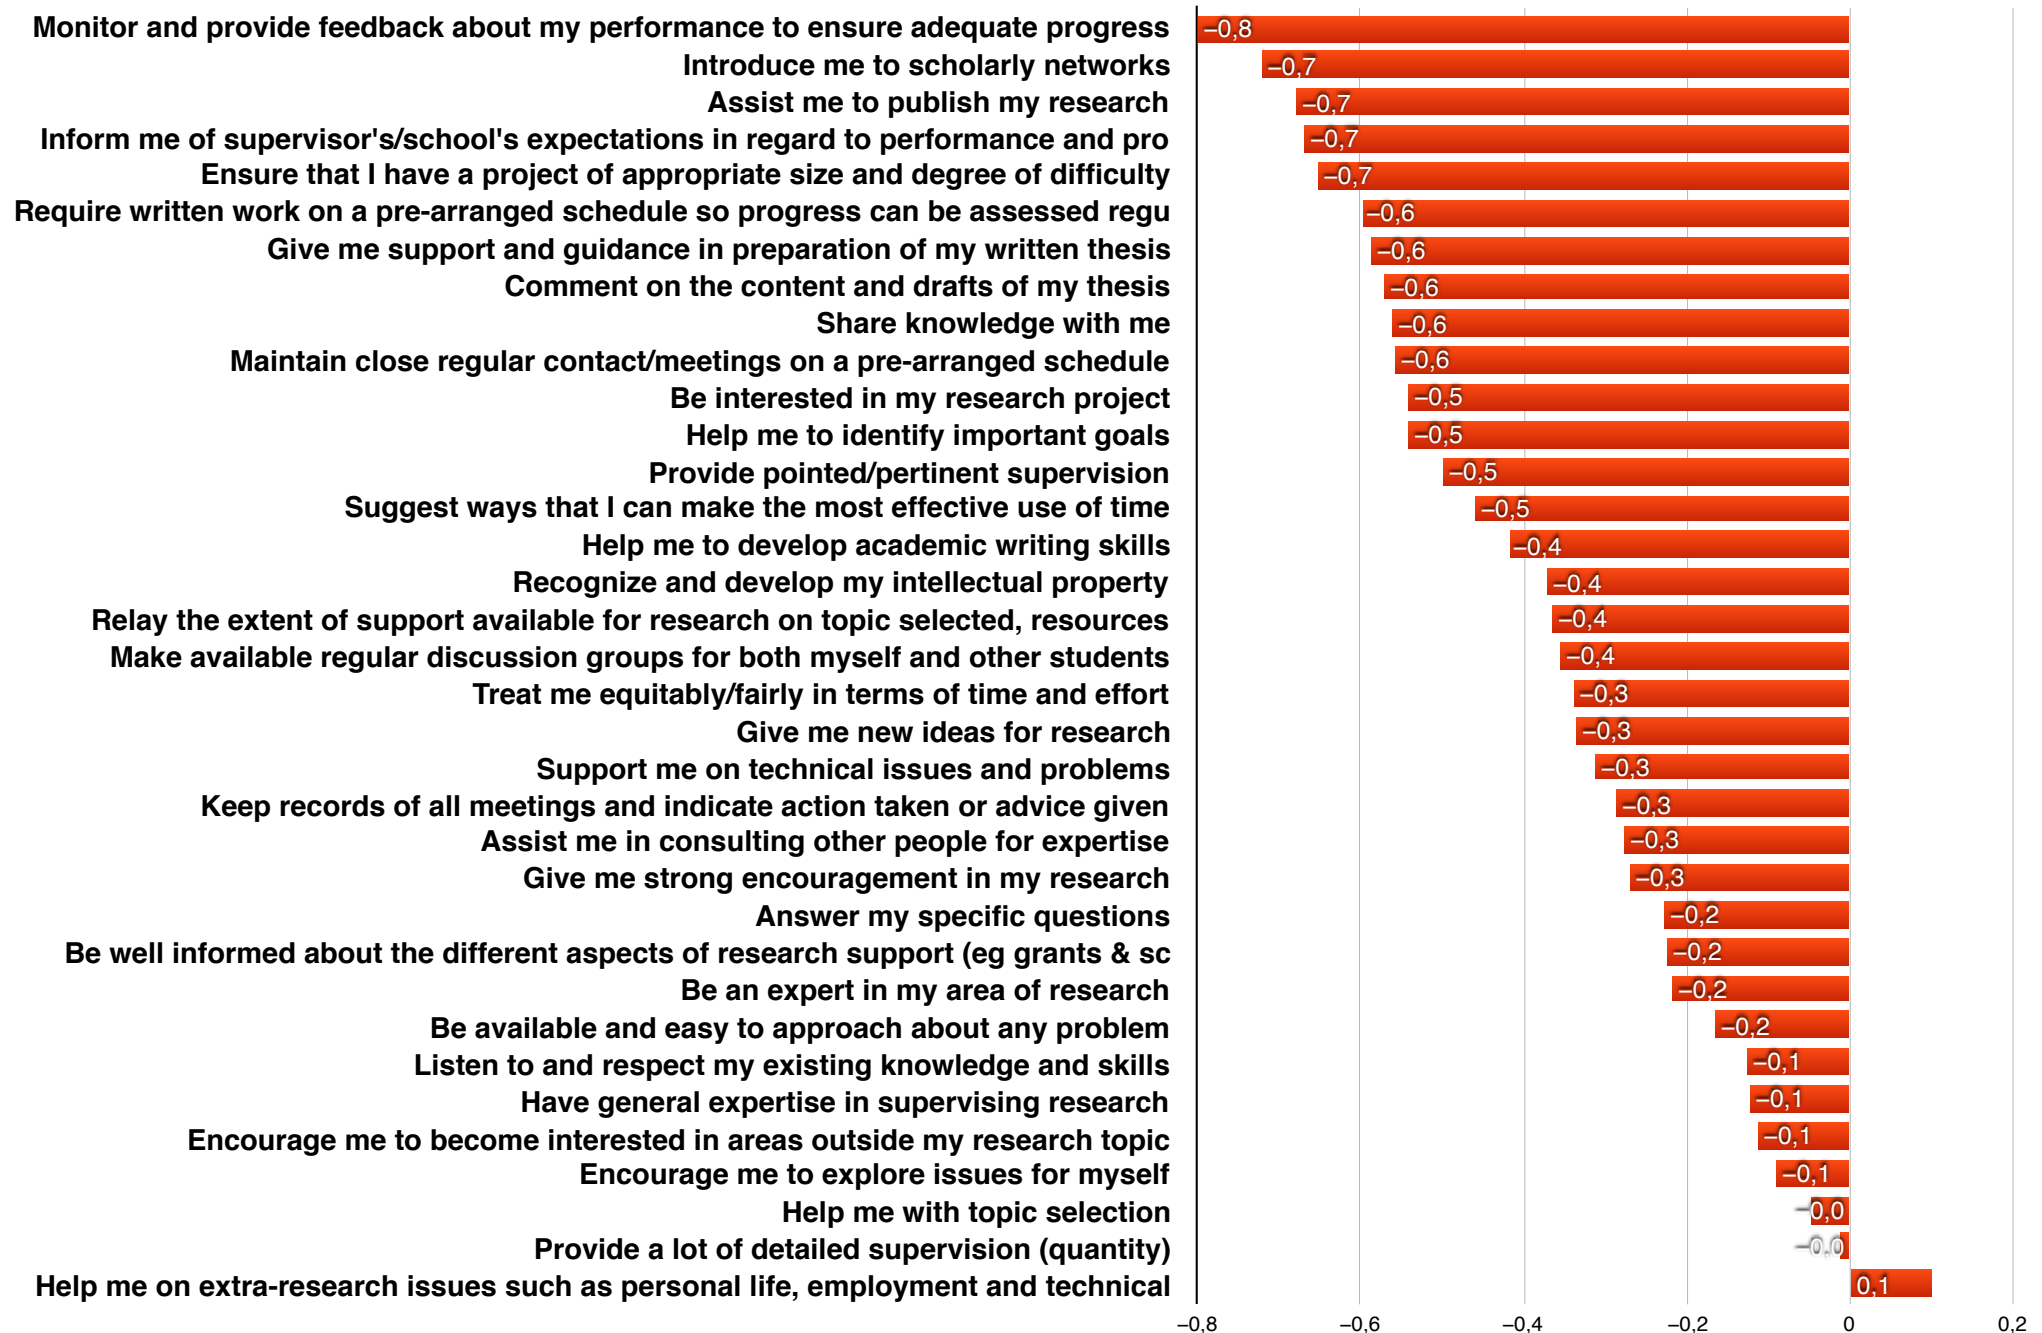

Being pessimistic about the quality of thesis (.17)

Writing a monograph (.14)

Experienced qualities in their PhD supervisor (all faculties)

The gap: Difference between preferred and experienced qualities in their PhD supervisor (all faculties)

Gaps between preferred and experienced supervision style: 4 components (PCA)

Only top four variables for each component is shown

1. Lack of support, time, feedback, encouragement

Give me support and guidance in preparation of my written thesis

Treat me equitably/fairly in terms of time and effort

Help me to develop academic writing skills

Comment on the content and drafts of my thesis

Give me new ideas for research

Help me with topic selection

Relay the extent of support available for research on topic selected

Be an expert in my area of research

2. Lack of specific academic expertise

3. Lack of freedom

Encourage me to become interested in areas outside my research topic

Encourage me to explore issues for myself

Help me on extra-research issues such as personal life, employment ...

Introduce me to scholarly networks

Require written work on a pre-arranged schedule so progress can be assessed regularly

Maintain close regular contact/meetings on a pre-arranged schedule

Monitor and provide feedback about my performance to ensure adequate progress

Provide a lot of detailed supervision (quantity)

4. Lack of regular meetings, monitoring of progress etc.

Gaps between preferred and experienced supervision style: 4 components (PCA)

Factors that correlate with these gaps (correlations)

1. Lack of support, time, feedback, encouragement

Being unsatisfied with supervision (.53) and pessimistic (.14)

Being female (.13), supervisor is another gender (.15), NOT master at UIB (-.16)

Writing an article-based PhD (.15)

NOT being a Law student (-.15)

Being unsatisfied with supervision (.51) and pessimistic (.21)

Not being a foreign student (-.13)

2. Lack of specific academic expertise

3. Lack of freedom

Being unsatisfied with supervision (.51) and pessimistic (.28)

Being male (.19), supervisor is another gender (.13)

Not being a foreign student (-.17)

Being unsatisfied with supervision (.49) and pessimistic (.31)

Being late in the PhD cycle (.14)

Not being a foreign student (-.14)

4. Lack of regular meetings, monitoring of progress etc.
